

Request for Qualifications for

Pitt River Bridge and Mary Hill Interchange Project

The Ministry of Transportation is inviting experienced teams to submit their qualifications to demonstrate their ability to design/build a new bridge that will replace the two existing swing bridges crossing the Pitt River, as well as a new grade-separated interchange to replace the existing Mary Hill Bypass/Lougheed Highway intersection.

This highway improvement project is part of a larger Ministry of Transportation initiative called the Gateway Program. The Gateway Program was established in response to the impact of growing regional congestion, and to improve the movement of people, goods and transit throughout Greater Vancouver.

We look forward to your participation in a project that will offer significant opportunity for innovation, technical expertise and efficiency.
