

Spirit One™ Bariatric Bed

Superior Bariatric
Innovation

The design of the Spirit One bed combines a traditional bariatric bed with a Med/Surg bed and a low bed height, resulting in a product designed for a wide range of patients.

Spirit One has a 1000 lb. weight capacity and is equipped with an expandable bed frame, tuckable quad siderails, integrated Bed Exit Alarm with Alarm Fatigue Prevention, integrated smart scale, an ultra-low bed height of 10.75-inch and much more. The Stryker Spirit One bed can help hospitals streamline their expenses, minimize training and reduce unnecessary inventory with one solution that meets all their needs.

Tuckable siderails to eliminate transfer gap and simplify transfers.

Flex Screen creates a unique user interface that combines a 4.3-inch LCD Color Display with programmable “hot keys”, giving staff the flexibility of a touch screen with the reliability of a touch keypad.

36-inches

42-inches

48-inches

Spirit One's siderails and mattress deck fully expand with the pull of three handles to accommodate weights up to 1000 lb. The headboard expands to maintain compliance with all entrapment zones.

10.75 inch low bed height for patient safety allows patient to enter and exit with stability

Instant CPR siderail drop function automatically positions the bed (including rails) for hospital staff.

Multizone obstruction sensors help to prevent injury or damage of equipment in patient room.

Integrated smart scale weighs up to 1000 lb. in any bed position with the touch of a button.

Watchdog® Indicator System helps to remind staff of routine procedures and properly identify patient needs.

Programmable night light promotes safety while getting in and out of bed and also provides comfort in an unfamiliar setting

Spirit One Bariatric Bed

Standard Spirit One Bariatric Bed Model Includes:

- Tuckable quad siderails with embedded patient controls
- Central Lock-and-Steer Brake System
- 6-inch easy-glide dual-wheel casters
